(54) Title: MOBILE MEDICATION HISTORY MANAGEMENT APPARATUS, MEMORY CARD, AND MANAGEMENT METHOD

(57) Abstract: A medication history management apparatus enables a person to check for side-effects caused by combinations of drugs, and duplicated administration of drugs, when purchasing non-prescription drugs, even without medical knowledge. The medical history management apparatus securely stores medication history information identifying drugs taken in the past and drugs prescribed in the past in a secure storage unit 403, and stores mutual effect information that shows side-effects caused by combinations of drugs. The medical history management apparatus receives input information identifying a drug from a keypad, judges whether the set of the input information and the any of the drug history information match the any of the mutual effect information, and outputs a judgment result.
